Diagnosis

- Normal Heart Size and Function
- Trivial tricuspid valve regurgitation
- No evidence of cardiomyopathy

Medications

- No cardiac medications are recommended at this time.
- River should be fine to stay in the breeding program

Please Note

- River is currently at low risk for clinical signs of her heart disease. However, please monitor for signs of cough, respiratory difficulty, exercise intolerance, weakness, or lethargy. If you note any of these symptoms, please notify CVCA or Dr. as these symptoms may indicate worsening of River's heart disease.
- Please see our website www.cvcavets.com for more information about your pet's degenerative valvular disease.

Reevaluation

- Recheck with Annapolis Animal Hospital as needed for routine examinations
- Recheck here with CVCA in 1-2 years (we typically recheck the females every 2 years while in the breeding program) or sooner if a murmur is noted

Visit Summary

Heart Rate: 160

BP:

Cuff size/location:

History: breeding screening, no cardiomyopathy noted on her direct line, no clinical signs of cardiac disease

Physical Exam Findings: no murmur, regular rhythm, good pulses, MM pink, CRT 2 sec, clear lung fields, abdomen tense and not painful, very active

Other Diagnostics:

Echocardiographic Findings

ECHO: Normal chamber dimensions and wall thickness, normal indices of left ventricular function based on the fractional shortening, normal valvular structure and function, normal right ventricular outflow velocities, trace tricuspid valve regurgitation, no moderator bands noted, no effusions or masses, normal echocardiogram

Comments

Dear Dr. Wozniak

I am very pleased with River's echo results. As stated above I feel she can continue in the breeding program. River was an excellent patient for us today. Please don't hesitate to call us with any questions or concern about this case or any others. In an effort to continue to improve CVCA's service to both you and your clients, please take time to visit our website at www.cvcavets.com and complete our on-line referring veterinarian survey.

Warm Regards,
